

# Testing Your Way!

Save money and take an active role in your care.

Patient-Directed Testing is offered as a wellness and personal health management tool, providing convenient and often less expensive testing.

## Patient-Directed Testing:

### ■ Does not require a doctor's order.

Order forms can be completed at the time of registration or in advance (for laboratory testing only) by visiting [WayneHealthCare.org/Testing](http://WayneHealthCare.org/Testing).

### ■ Allows patients to take control of their healthcare.

Services are similar to a health fair and are available at a discounted price.

### ■ Results are sent directly to the patient.

It is highly recommended that patients share and discuss their results with their primary care provider.

# Testing Your Way!

PATIENT-DIRECTED TESTING

## Hours and Scheduling

PATIENT-DIRECTED TESTING

### Laboratory Tests and EKGs

APPOINTMENT NOT REQUIRED

Monday – Friday | 7:00 am to 5:00 pm  
Saturday | 7:00 am to Noon

### Vascular Screening, DEXA (Bone Density) Exam and Mammography

APPOINTMENT REQUIRED

Monday – Friday | 7:00 am to 5:00 pm

Call (937) 547-5715  
to schedule an appointment.

835 Sweitzer Street | Greenville, OH 45331

[WayneHealthCare.org](http://WayneHealthCare.org)

Outpatient tests and screenings  
without a doctor's order.

# Laboratory Tests

APPOINTMENT NOT REQUIRED

## Wellness Panel: \$50

Used to measure overall health and wellness, the panel includes 14 chemistry tests to check kidney function, liver function, blood sugar level, and protein levels. A Lipid Panel (cholesterol, HDL, LDL and triglycerides) is also included. **An 8 to 12 hour fast is required.**

## Vitamin D: \$60

A test to screen for Vitamin D deficiency. Adequate Vitamin D levels play an integral role in bone health and decreasing the risks for colorectal cancer, breast cancer and autoimmune disease.

## Prostate Specific Antigen (PSA): \$45

A screening test for early detection of prostate cancer. This test should be performed in conjunction with a clinical evaluation by your physician.

## Thyroid Panel (TSH/FT4): \$45

Tests to evaluate thyroid function and screen for thyroid disease.

## Liver Panel: \$30

A test to evaluate hepatic function, which can be affected by medications, alcohol use, cirrhosis, hepatitis, and other diseases. **Included in Wellness Panel.**

## Urine Pregnancy: \$15

A screen to confirm pregnancy.

## Hemoglobin A1c: \$30

A test used to assess glucose levels in diabetics. A1c is frequently used in conjunction with glucose fasting to diagnose diabetes.

## Iron: \$20

A screening test for anemia and other iron disorders.

## COVID-19 Rapid PCR: \$100

This test detects genetic material of the virus using a lab technique called polymerase chain reaction (PCR).

## COVID-19 IgG Antibody: \$65

This test checks for antibodies to COVID-19. These antibodies indicate that you may have had COVID-19 in the recent past.

## Complete Blood Count & Differential: \$30

A test to evaluate overall health and detect a wide range of hematologic disorders including anemia. This test includes white and red blood cell counts, hemoglobin, hematocrit, platelet count, and a WBC differential.

## Lipid Panel: \$35

A screening test for hyperlipidemia - a risk factor for coronary artery disease and stroke. This profile includes total cholesterol, HDL, LDL and triglycerides. **An 8 to 12 hour fast is required. Included in Wellness Panel.**

## Glucose Fasting: \$15

A fasting blood sugar level to screen for diabetes. **An 8 to 12 hour fast is required. Included in Wellness Panel.**

## Potassium: \$15

A test to evaluate potassium levels, which can be affected by medication (especially diuretics) and many diseases. **Included in Wellness Panel.**

## Basic Metabolic Panel (BMP): \$30

Eight chemistry tests to check blood sugar, electrolytes and kidney function. This panel includes glucose, BUN, creatinine, calcium, sodium, potassium, chloride and CO<sub>2</sub>. **An 8 to 12 hour fast is required. Included in Wellness Panel.**

## Cholesterol: \$20

A screening test for elevated cholesterol levels, which can be a risk factor for coronary heart disease and stroke. **Included in Wellness Panel and Lipid Panel.**

# Electrocardiogram

APPOINTMENT NOT REQUIRED

## Electrocardiogram (EKG): \$35\*

A screening test to monitor the electrical activity of the heart. This test helps diagnose various heart conditions.

# Diagnostic Imaging

APPOINTMENT REQUIRED

## Vascular Screening Package: \$25\*

Discounted screenings are now possible year round, courtesy of the Wayne HealthCare Foundation, in partnership with the Bob Menke HeartWise Initiative.

Includes all three of the screenings listed below:

### ■ Abdominal Aorta Vascular Ultrasound

A screening test to check for the presence of an aneurysm that could lead to a ruptured aorta.

### ■ Carotid Vascular Ultrasound

A screening test to check for plaque buildup in the carotid arteries to help identify the risk of a stroke.

### ■ Peripheral Arterial Disease

A screening test that measures the circulation to your legs to help identify the risk of a heart attack or stroke.

## DEXA (Bone Density) Exam: \$489<sup>†</sup>

For men and women age 35 and above. An osteoporosis screening test that measures bone density and the patient's risk of breaking a bone.

## Mammography Screening: \$254<sup>†</sup>

For women age 40 and older who are asymptomatic. Includes 3D Tomosynthesis and Mammography Screening with CAD (computer-aided detection).

<sup>†</sup> For DEXA Exam & Mammography Screening, a provider order is required in order for insurance to be billed for the screening and the additional radiologist fee. An out-of-pocket payment is required for screening and radiologist fee without a provider order.

Note: Prices subject to change.

\*If you are experiencing chest pain or like symptoms, please seek medical attention and speak to your Primary Care professional.
